EXPERIENCE

Research Assistant

Jul. 2023 – Present

Research Center for Information Technology Innovation, Academia Sinica, Advisor: Jun-Cheng Chen Taipei, Taiwan

- Designed a unified Kinship Face Synthesis framework for generating child and partner facial images by integrating StyleGAN and Diffusion Models, enhancing kinship consistency and generation diversity.
- Developed a more comprehensive evaluation metric to assess face editing performance in generative models, alleviating existing benchmarking limitations.
- Designed an efficient and plug-and-play precise concept intensity control approach in image and video synthesis.
